Ref. 2016-H-04

The Canadian Nuclear Safety Commission (CNSC) will hold a public hearing to consider an application from the Saskatchewan Research Council (SRC) to remove the hold point for Phase 2 of the Gunnar Remediation Project. The Gunnar site, located in northern Saskatchewan, is being remediated by the SRC under a CNSC waste nuclear substance licence. The licence includes a regulatory hold point that requires SRC to receive approval from the Commission before proceeding with Phase 2 of the project.

After a hearing held in September 2015, the Commission removed the hold point pertaining to the remediation of the tailings deposits at the Gunnar site. The SRC has applied to the CNSC for removal of the remainder of the hold point pertaining to the remediation of other site components, which include the waste rock piles, the open pit, the mine openings and other demolition waste.
